

After the Finish Line

Where does the race end for a Thoroughbred and what awaits them *After the Finish Line*? Every horse reaches the Finish Line at a different stage in their life.

Are the Thoroughbreds in control of their destiny once they arrive at this point, or does someone else make decisions for them that are in the individual's best interest regardless of what is best for the horse?

After the Finish Line should be a time of victory, a momentous occasion of hope and security for a Thoroughbred. It should be a helping hand leading them home, a time to heal from an injury, a time to transition into a second career or a time to bask in the sunshine of life.

After the Finish Line was started to help the Thoroughbreds that have no voice once they cross the Finish Line. Speak up for these majestic and noble animals.

Your shadow walks stride for stride with theirs. Let your shadow represent the bond of trust and love for the horse you helped rescue.

Just imagine how many horses we can rescue on a sunny day.
